

The End of Economic Man: The Origins of Totalitarianism

By Peter F. Drucker

In *The End of Economic Man*, long recognized as a cornerstone work, Peter F. Drucker explains and interprets fascism and Nazism as fundamental revolutions. In some ways, this book anticipated by more than a decade the existentialism that came to dominate the European political mood in the postwar period. Drucker provides a special addition to the massive literature on existentialism and alienation since World War II. *The End of Economic Man* is a social and political effort to explain the subjective consequences of the social upheavals caused by warfare.

Drucker concentrates on one specific historical event: the breakdown of the social and political structure of Europe which culminated in the rise of Nazi totalitarianism to mastery over Europe. He explains the tragedy of Europe as the loss of political faith, resulting from the political alienation of the European masses. *The End of Economic Man* is a book of great social import. It shows not only what might have helped the older generation avert the catastrophe of Nazism, but also how today's generation can prevent another such catastrophe. This work will be of special interest to political scientists, intellectual historians, and sociologists.

The book was singled out for praise on both sides of the Atlantic, and is considered by the author to be his most prescient effort in social theory.

editorial:

Review

"*The End of Economic Man* is . . . [a] challenging and penetrating analytical study of the totalitarian state. Mr. Drucker has succeeded in injecting in the much overworked and often tedious discussion of fascism remarkable vigor and freshness, and his brilliantly written book is certain to be read with sustained interest."

—*The New York Times*

"[The author] not only has a mind of his own, but has the gift of starting other minds along a stimulating line of thought."

—*Times (London) Literary Supplement*

About the Author

Peter F. Drucker (1909-2005) is known by many as the father of modern management. He was Clarke Professor of Social Science and Management at Claremont Graduate School in California and was a recipient of the Presidential Medal of Freedom. He is the author of over thirty-five books, including *The Ecological Vision*, *The Concept of the Corporation*, and *A Functioning Society*.
