- 538 pages

editorial:

Review

Contributors from the UK report on recent research and cases in using technology to respond to the specific needs and interests of each student. The cases described range from whole class to individual delivery, in large universities and small departments, and among all content areas. --*Sci Tech Book News, BookNews.com*

About the Author

John O'Donoghue initially taught in a social priority area school, moving later to post graduate lecturing, advising and consultancy for both initial teaching training and education departments and more recently a within a National ICT Research Unit. He has held the position of chair and president of the Association for Learning Technology and has hosted a number of regional, national and international conferences. O Donoghue has held honorary research fellowships at universities across the globe. He now holds a visiting research fellowship at the University of Wollongong, Australia. Currently, Professor O'Donoghue was appointed Professor of Learning and Technology at the University of Central Lancashire, UK. O Donoghue was previously a Senior Learning and Teaching Fellow at the Centre of Excellence in Learning and Teaching at the University of Wolverhampton. He is also a consultant and an advocate of the global classroom. He sits on a number of review, editorial and programme committees.
